BARR'S DAFFODILS.

THE FAVOURITE HARDY FLOWERS OF SPRING.

DAFFODILS are the most graceful and beautiful of all Hardy Spring Garden Flowers, and withstand uninjured our severest winters better than any other flower. The cut blooms are always acceptable, and are in abundance out of doors at a season when other flowers are scarce. They supplement and associate admirably with hot-house flowers.

We have received the following **HIGHEST AWARDS** for our **EXHIBITS OF DAFFODILS**, Spring, 1902.

N. JOHNSTONI QUEEN OF SPAIN.

- | | | |
|----------|-----|---|
| February | 25. | SILVER MEDAL (Highest Award), R.H.S., London. |

| " | 24. | SILVER MEDAL for the <u>best new Trumpet Daffodil in the Show</u> , Midland Daffodil Society, Birmingham. |

Numerous Awards and FIRST-CLASS CERTIFICATES have also been given to individual varieties.

PRESS NOTICES OF BARR'S DAFFODILS.

Extract from "The Saturday Review," April 26th, 1902.

"IN THE LAND OF DAFFODILS.

"... As we wonder at these delicious flowers, and the more we contemplate and curiously study them, we are filled with admiration and gratitude for what the horticultural art has accomplished in their cultivation, and is still year by year accomplishing. Each season brings with it some fresh development of form and hue. Not that the old forms and hues lose their charm and are displaced, but perpetually are they being added to. Even the most casual stroller through our parks is aware of this; but really to appreciate what is being done we must give ourselves a few hours' holiday one bright day, and visit the very nursing-homes of these entrancing creatures—let us say Messrs. Barr and Sons' spacious grounds at Long Ditton in Surrey, but ten minutes' walk or so from the Surbiton station, the easiest place in the world for a busy Londoner to run down to. Those few hours' holiday we shall be more than repaid for snatching; they will send us back to our work strangely refreshed. For indeed to wander up and down among these vast stretches of 'dancing daffodils' is to fancy oneself translated back into the flowery plain of Enna, or the very unsullied meads of Paradise itself. It is far different from your ordinary flower-show, however sumptuous, with its crowd of fashionables and its stifling

marquees. Here you are under the open sky, in a space of sweet English country with its rich lanes and stately elm trees, wandering alone at your will amid constantly changing beauty, and the delicate perfumes the pure air wafts around you. What a world of good it does to body and brain and heart this hour or two's translation! And the longer you stay the more the charm of the place steals upon you. You cannot take the glory in at a glance. Neither art nor nature, and here are both interwoven, will give up its secrets to a careless, idle eye. You must look patiently and curiously, if you are to appreciate what art and nature have been at work upon with subtle changefulness. It is in the turn of a petal, the inexpressible fresh shade of a colour, the dainty combination of some slightly strange form and tint, that the true lover of flowers will find here his interest constantly awakened, his appreciation constantly won.

"And this year, as in former years, there is no failure in the varieties Messrs. Barr present us with either in regard of number or distinction. Some of these are entirely new, not yet ready to be put on the market, some indeed are still waiting to be named. To be allowed a sight of these beauties before they are formally introduced to the world gives you a certain sense of intimacy with the very aristocracy of flowers, which one may be pardoned for feeling undeniably gratifying. The superb white trumpet daffodil, **Peter Barr**, is one of these, unrivalled for its combination of size and delicacy, and well named after the venerable founder of the firm, to whose enthusiasm and assiduous pains through so many long years all lovers of the narcissi owe so much. . . ."

Extract from "The Westminster Gazette," April 24th, 1902.

"DAFFODILS AT SURBITON.

"It is sometimes said that it is impossible to realise what a million means. Elaborate calculations are then made as to the mileage which would be covered were a million golden sovereigns put in a row. But anyone living in or near London can just now obtain a very fair idea of what a million golden circles look like by going no farther than from Waterloo to Surbiton. Only, the gold is of the innocent kind which Nature draws each April from the soil, and the circles are not coins of the realm, but daffodils of every imaginable size and tint of yellow. Far beyond a million bulbs were last autumn put into the ground at Messrs. Barr and Sons' nurseries, ten minutes' walk from Surbiton Station, and most of these are now in full and splendid bloom, standing above their beautiful bluish-green foliage in fresh and dewy sweetness. There are beds upon beds, each containing 10,000 plants, and the sight is one which is unique in the length and breadth of the land. Over 200 varieties of daffodils form this collection, and between the stretches of golden-yellow there shine and gleam great squares of early tulips, flame-coloured, rosy pink, pure white, and delicate purple. Beds of hyacinths fill the air with their fragrance, and others of the dainty grape hyacinth give the eye a rest with their rich blue.

"In a special enclosure the new varieties form a feature of great interest, for here, after years of careful tending, new daffodils bloom for the first time. There are some very interesting flowers among this year's crop of novelties; perhaps the most striking is a beautiful clear yellow trumpet daffodil standing two feet high on its graceful stem. Many other flowers and plants of interest to gardening folk are to be seen at Messrs. Barr's bulb grounds; and as the public are invited to visit the grounds while the present marvellous daffodil show is on, we hope many of our readers will avail themselves of this opportunity of 'seeing a million.' They will find that the show is well worth a visit."

Extract from "The Garden," April 26th, 1902.

"DAFFODILS AT MESSRS. BARR AND SONS'.

"At present it is almost superfluous to say it is daffodil time, and in the minds of many, daffodils and Messrs. Barr and Sons are inseparably associated, at least all who have had the pleasure of visiting the Surbiton nurseries during April and May will not hesitate to admit.

"To-day there are some hundreds of thousands of daffodil flowers—amongst them many of the most beautiful varieties known—nodding their dainty heads to the breeze, and making a ripple upon a sea of yellow and green.

"A flower that we were particularly delighted with is **Maggie May**, the largest and most beautiful of the Leedsii section; this variety has also the merit of being a strong grower. **Narcissus Weardale Perfection** is a flower that will doubtless always be sought after. It is one of the finest of daffodils; the perianth is large and white and the trumpet of great size, in colour a lovely pale primrose. **Lucifer**, with a large white perianth and an intense orange-red cup, is a bold and handsome flower, and the plant is a vigorous grower.

"A daffodil that has been prominent lately is **King Alfred**, bearing very large yet refined flowers of an uniform rich golden colour. **Sentinel** (bicolor), with pure white perianth and short clear yellow trumpet, the flowers just overtopping the foliage; **Willie Barr**, a trumpet daffodil with a soft yellow-coloured perianth, the trumpet a deep yellow; **Phyllis** (Leedsii), a lovely flower, having a white perianth and straight canary-coloured cup; **Monarch**, one of the very best of the golden trumpet daffodils; **Madame de Graaff**, a well-known beautiful white trumpet; **Glory of Leyden**, another giant trumpet flower; **J. B. M. Camm**, a beautiful variety with a white perianth, and a trumpet of pale chrome-yellow, are a few remarkable flowers.

"Perhaps as delicately beautiful and charming as any is the **Narcissus** known as **Apricot**. The flower is of moderate size, but its colouring is unique. The perianth is white, the long straight trumpet opening a soft primrose and passing to a rosy apricot buff; the flowers are also sweetly scented. We were privileged to see some of the choicest and best flowers that the daffodil world can show in that part of the nursery devoted to seedlings, many yet unnamed. Prominent amongst many most beautiful flowers it is not difficult to distinguish the magnificent new **Narcissus Peter Barr**, a pure white trumpet. Our note concerning it when it was recently awarded a first-class certificate by the Royal Horticultural Society will bear repetition. It cannot be compared to any other. It is longer in the crown than **Madame de Graaff** and rather less revolute at the brim, while the perianth impresses one with its greatness and its beauty. The flower **Peter Barr** has assuredly wrested the laurels from **Madame de Graaff** a variety that has long been considered the finest white trumpet in cultivation."

CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

SOIL AND ITS TREATMENT.—The Daffodil will thrive in any ordinary garden soil, but prefers a deep, rather moist loam. When the soil is of a dry and sandy nature, it should be deeply dug, rotten stable manure should be added, and a potato or other crop taken off before planting. If this is not convenient, then place the manure at least 12 inches deep, so as to be out of the reach of the bulbs; the manure is used not as a stimulant but as a sponge to hold moisture in the soil. The ammoniacal properties of manure are injurious to the Daffodil, hence great care is necessary in the use of it.

Freshly dug Soil should be allowed to stand vacant two to three weeks before planting, to allow the ground to settle down, otherwise the freshly planted bulbs are often drawn under considerably below their proper depth, and the bloom in consequence is weakened and retarded.

Best and Safest Manure to use is Crushed Bones or Basic Slag (*for price see page 29*). This should be applied at planting time, and may be mixed with the soil or placed next the bulbs; the Crushed Bones may be applied at the rate of 4 cwt. to the acre, or $1\frac{1}{2}$ oz. to the square yard, and Basic Slag may be applied in same manner at the rate of 1 ton to the acre, or $7\frac{1}{2}$ oz. to the square yard. We recommend for light soils Crushed Bones (providing they are genuine) in preference to Basic Slag. On very poor and DRY SANDY SOILS we recommend in addition SULPHATE OF POTASH (*for price see page 29*), to be sprinkled annually in the autumn over the surface of the ground, after planting, at the rate of 2 cwt. to the acre, or about $\frac{3}{4}$ oz. to the square yard. The potash not only increases the depth of colour in the flowers, but also helps to hold moisture in the soil, a condition so essential to the perfect development of the Daffodil. We also recommend the use of Phytobroma in autumn and spring (*see particulars, page 29*).

In Early Spring, as soon as the Daffodils begin to show above ground, the surface soil should be well broken with a hoe, to sweeten it after the heavy winter rains.

PLANTING AND LIFTING.—The best time to plant, to obtain the finest flowers, is during August and September, *although bulbs may be planted as late as Christmas with very satisfactory results.* (Mr. William Robinson has planted Daffodils at Gravetye as late as February, and they have bloomed well.) The bulbs may be left undisturbed for years in ordinary good loamy soils, but on poor and light soils they are better lifted every two years, as soon as the foliage has died down, and replanted as early as is convenient. Never plant when the ground is wet and sticky; wait until it is dry or friable. Do not put silver sand around the bulbs of Narcissi except in the case of *N. corbularia*.

Depth to Plant—The average depth to plant is from 2 to 3 inches, that is to say, a covering of 2 to 3 inches of soil, but not more. As the bulbs vary considerably in size, according to the relative varieties, the best rule to go by is the bulb itself, which should be covered with soil once and a half its own depth, measuring the bulb from the collar of its neck to its actual base.

POSITION AND GROUPING FOR EFFECT.—All Daffodils prefer partial shade, although most of them will grow equally well in the open. The varieties which are best grown in partial shade are indicated in the following pages by an *. In the flower border, to obtain the best effect, Daffodils should be planted in large groups of irregular outline, each group or clump to contain one variety only; avoid straight lines, circles, and symmetrical designs. Masses of Daffodils should always appear in the Hardy Flower border, where irregular and effective sweeps can be planted between the clumps of herbaceous plants which in their turn grow up and hide as well as shelter the Daffodil foliage while it is going to rest. In grouping Daffodils the season of flowering should be borne in mind, as the varieties bloom in succession from the end of February to the end of May, during which period, by a judicious arrangement, a constant succession of flower is obtainable. In the following pages we denote the rotation of blooming. (*See page 12.*)

NATURALISING DAFFODILS IN GRASS.—All Daffodils may be planted in grass with perfect success. To produce the best effect, the three groups should be kept separate: thus the Star Narcissi should not be mixed with the Great Trumpets, nor Poet's Narcissi with the Star Narcissi. In arranging, make the breaks large and bold, scattering the bulbs over the ground broadcast with the hand, and planting them where they fall. Avoid symmetrical lines or formal circles as far as possible, as these are never found in nature.

Varieties specially Suitable for Naturalising in Grass, Woodlands, etc.—These are all free seeders, and will therefore spread naturally; they are mostly wild plants—*Abcissus*, *Achilles*, *Countess of Annesley*, *Golden Spur*, *Henry Irving*, *Ohvallaris*, *Spurius*, *English Lent Lily*, *Princeps*, *Scoticus*, *Variiformis*, *Albicans*, *Pallidus Præcox*, *Moschatus* of Haworth (very pretty in grass), and all varieties of *Poëticus*. THE VARIETIES UNDERLINED we do not recommend for the cultivated border, as they deteriorate the second year, while in grass or meadowland they flourish.

Method of Planting Daffodils in Grass.—We recommend for this work our SPECIAL BULB PLANTER (*see illustration, page 28*). By the use of this implement the trouble of planting bulbs in grass is reduced to a minimum. It takes out a clean, circular little sod of turf 2 inches in diameter, and of sufficient depth. On making the second hole this piece of turf is released from the planter and lies ready on the ground to cover the bulb with. The soil is not in any way tightly pressed and made hard, which is the case when an ordinary dibber is used, and the appearance of the grass is not spoilt; in fact, after planting 10,000 bulbs with this tool on a greensward, one could not detect that the grass had been touched. If the ground is very poor and thin, a compost of fresh soil with an abundance of *Crushed Bones* (7 lbs. to a bushel) should be made and dropped into each hole before placing in the bulb, a little more should be given as a covering, and then the sod of turf be replaced and pressed down. The bulbs will then be given a fair start in their new quarters. The work of planting bulbs in grass should be carried out while the ground is in a fairly moist condition. In planting under trees, avoid places where the drip from the branches is greatest, also where the main roots of the trees come close to the surface. (*For price of Barr's Special Bulb Planter, see page 28.*)

CULTURE OF THE DAFFODIL IN POTS AND BOWLS, Etc., FOR INDOOR DECORATION.

Of the stronger growing sorts use three to six bulbs, according to size of bulb, for a $4\frac{1}{2}$ to 6-inch pot ; of the small growing kinds, such as *N. Minimus*, *Nanus*, *Minor*, *Cyclamineus*, *Triandrus*, *Juncifolius*, and *Coriularias*, use twelve to eighteen bulbs for a $4\frac{1}{2}$ to 6-inch pot. These small-flowered dwarf-growing species are most charming in pots or little shallow pans. The following may easily be had in bloom in January :—*N. Minimus*, *Minor*, *Nanus*, and *Cyclamineus*, and these may be mingled with *Chionodoxas*, as both bloom at the same period and produce a charming contrast. The White Hoop Petticoat *Narcissus* should be potted in almost pure sand kept well moist, and may be had in bloom shortly after Christmas. (See *Rock Garden Collections of Miniature Daffodils*, page 7.)

All Daffodils may be grown in pots, but in the following pages we have indicated thus † those kinds which are best for this purpose.

If Daffodils are wanted in quantity for cutting early in the season, plant thickly in boxes five to six inches deep, and only just cover the bulbs with soil. The *pots* or *boxes* should then be placed out of doors on a firm bottom, such as a bed of ashes or a gravel path, and be covered with six inches of ashes or cocoanut fibre. When the bulbs have filled the pots or boxes with roots and made an inch or two of top growth, portions should be removed indoors in succession, selecting first those which flower naturally early. First place in a cold frame or cool greenhouse, and when the flower buds are well advanced shift to a slow forcing house, when they should have abundance of water and plenty of air. The plants should be kept as near to the glass as possible, and not allowed to get drawn from an insufficient supply of light or air. On no account should bottom heat be given.

A charming effect is obtained by growing Daffodils in fancy bowls, simply using cocoa fibre or our Special Mixture of Cocoa Fibre and Charcoal ($\frac{1}{6}$ per bushel, 1/- per peck). Fill the bowls one-third up with fibre, then insert the bulbs and fill up nearly to the top with fibre. Give sufficient water to make the whole firm, and after that simply keep the fibre moderately damp. Daffodils may be grown successfully in this way in a cool greenhouse or sitting-room window (by preference a room without a fire). They should be grown cool, and not brought into warmth until the flower buds are colouring. For price of suitable bowls for this purpose, see page 29.

ON CUTTING DAFFODILS FOR DECORATION.

To obtain very fine blooms Daffodils should be cut in a young state, just when the bud has well broken, and is expanding from the spathe. Place in water and allow the flowers to open in a cool greenhouse or sitting room. The blooms opened in this way are larger than those which develop out of doors.

DAFFODIL COLOURED PLATES.

These Daffodil Plates can be had, post free, at the following charges :—

- (A) Two large Uncoloured Illustrations, one representing a group of Yellow Trumpet Daffodils, and the other a group of White Trumpet Daffodils, drawn and arranged for the "*Gardeners' Chronicle*" by Agnes Barr. The two Plates for 1s.
- (B) Coloured Plate of Daffodils, representing *Incomparabilis Gloria Mundi*, *Incomparabilis Princess Mary*, and *Leedsii Beatrice*. 1s.
- (C) Coloured Plate of Daffodils, representing a group of *Poeticus* and *Burbidgei* varieties. 1s.
- (D) Coloured Plate of a group of Daffodils, including *Cernuus pulcher*, *Johnstoni Queen of Spain*, *Bicolor J. B. M. Camm*, *Leedsii Superbus*, *Nelsoni* varieties, etc. 1s.
- (E) Coloured Plate of a group of Daffodils, including *Barrii conspicuus*, *Triandrus albus*, *Leedsii Mrs. Langtry*, *Bicolor J. B. M. Camm*, *Johnstoni Queen of Spain*, *Cyclamineus*, and *Minimus*. 1s.
- (F) Coloured Plate of a group of Barr's beautiful new Daffodil "*Queen of Spain*." 6d.
- (G) Coloured Plate of Daffodil *Incomparabilis Sir Watkin*. 6d.
- (H) Coloured Plate of Daffodils *Madame de Graaff* and *Apricot*. 6d.
- (I) Coloured Plate of Daffodils *Wardale Perfection*, *Monarch*, and *Lulworth*. 6d.

A COMPLETE SET OF THE ABOVE PLATES SENT, POST PAID, FOR 5s. 6d.

 Good Water-colour Paintings of any Daffodil can be supplied (to order) during the Daffodil flowering season at the rate of 10s. 6d. per bloom; Wash Drawings in black and white, 7s. 6d. per bloom.

Orders should be given early.

"YE NARCISSUS or DAFFODYL." By PETER BARR and F. W. BURBIDGE.

A few copies still remain of "*Ye Daffodyl*," price 1s. This is a record of the First Daffodil Conference, 1884, and contains a great deal of very interesting matter connected with the History and Literature of the Daffodil, with notes on culture and hybridisation; also a complete descriptive list of all Daffodils, ancient and modern, known up to 1884.

SELECTIONS OF

Barr's Beautiful Daffodils

FOR AMATEURS.

BARR'S POPULAR COLLECTION of DAFFODILS, 21/-,

Consisting of 6 bulbs each of the following fine distinct varieties, selected from Groups I., II., and III., and suitable either for pot-culture, for the flower border, or to naturalise in grass, etc.

6 Emperor	6 Albicans	6 Leedsii Mrs. Langtry
6 Golden Spur	6 W. P. Milner	6 „ Minnie Hume
6 Henry Irving	6 Incomparabilis Gwyther	6 Barrii conspicuus
6 Johnstoni Queen of Spain	6 „ Sir Watkin	6 „ Flora Wilson
(See Illustration, page 1)	6 „ Stella Superba	6 Nelsoni Mrs. Backhouse
6 Maximus	6 „ Queen Bess	6 Burbidgei Baroness Heath
6 Bicolor Empress	6 „ Double "Eggs and Bacon"	6 „ Ellen Barr
6 „ Grandis	6 Incomparabilis Double	6 Poeticus Poetarum
6 „ Horsfieldii	6 „ Codlins and Cream"	

BARR'S POPULAR COLLECTION of DAFFODILS, 10/6,

Consisting of 3 bulbs each of the fine distinct varieties enumerated in the above collection.

BARR'S EXTRA CHOICE COLLECTION of DAFFODILS, 63/-,

Consisting of 3 bulbs each of the following choice distinct varieties, selected from Groups I., II., and III., and suitable either for pot culture, for the flower border, or to naturalise in grass.

3 Glory of Leiden	3 Madame de Graaff	3 Leedsii Duchess of Westminster
3 Johnstoni Queen of Spain	3 William Goldring	3 „ Katherine Spurrell
3 M. J. Berkeley	3 Incomparabilis Beauty	3 „ M. M. de Graaff
3 Ray Smith	3 „ Mabel Cowan	3 Barrii Crown Prince
3 Bicolor J. B. M. Camm	3 „ Princess Mary	3 „ Siddington
3 „ Mrs. Walter Ware	3 „ Vesuvius	3 Burbidgei Sequin
3 „ Victoria		3 Poeticus Almira

BARR'S EXTRA CHOICE COLLECTION of DAFFODILS, 21/-,

Consisting of 1 bulb each of the same choice varieties as enumerated in the above collection.

Should our Customers already possess any of the sorts named in the foregoing Collections, we shall be pleased to substitute other varieties.

BARR'S "EXHIBITION" Collections of High Class DAFFODILS.

SELECTED FROM GROUPS I., II., AND III.

For Amateurs who wish to successfully compete at Spring Flower Shows for Daffodil Prizes.

BARR'S MINIATURE DAFFODILS FOR THE "ROCK GARDEN."

The following are charming little subjects for rockwork, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. All the *Corbularios* (except *Corbularia monophylla*) like moisture, and should therefore be planted at the foot of the rockery. *Cyclamineus* also likes moisture and partial shade. *Corbularia monophylla* flourishes in a warm dry sheltered situation, and should be given a hot sunny nook, planted in almost pure sand; when coming into bloom give water freely. *Triandrus albus* (*Angel's Tears*) and *Juncifolius* delight in partial shade and a light gritty soil, and

WHITE HOOP PETTICOAT (*Corbularia monophylla*). (See page 12.)

should be given a well-drained position such as a sloping bank. In the case of these slender dwarf-growing Miniature Daffodils, the ground may be carpeted with close-growing surface rooting plants, such as *Arenaria cespitosa*, *Thymus serpyllum* vars., *T. lanuginosus*, *Herniaria glabra*, Mossy *Saxifragus*, etc.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed and soiled in rainy weather. We prefer, however, seeing these little gems peeping out of grass, and where special banks are made or reserved for them we can supply seed of suitable fine dwarf grasses for sowing in September after planting the bulbs; this sowing will give a fine green carpet by the following spring when the Narcissi bloom.

NARCISSUS CYCLAMINEUS

Beautiful New and Rare Daffodils.

The following list of Daffodils includes the best of recently raised seedlings, and purchasers cannot fail to be pleased with them. In point of quality they all rank high, while a robust healthy constitution renders them additionally valuable. They will well repay a *good culture* by the size and beauty of their flowers.

For GIANT TRUMPETS we can strongly recommend *Big Ben*, *Duke of Bedford*, *Monarch*, *King Alfred*, and *Weardale Perfection*, while *Maggie May*, *White Queen*, and *Ariadne* may be termed the QUEENS OF THE LEEDSH SECTION for their size, grace, and beauty. For richly coloured cups, *Lucifer*, *Gloria Mundi*, and *Vivid* are unsurpassed. The new varieties of Burbidgei *Egret*, *Rosalind*, and *Sceptre* are exceptionally beautiful.

New Daffodils not offered in the following List can generally be supplied at Advertisers' prices.

☞ We give in inches the heights as registered at our Ditton Hill Nurseries, where we have a record.

☞ The varieties marked † are suitable for pots as well as for the border.

† ARIADNE (Leedsii) , perianth white, cup ivory white, very large, saucer-shaped, wide and spreading, prettily frilled at margin, a striking flower, lasting long. Award of Merit Birmingham, 1902	1	5 0
† ARTEMIS (Incomparabilis) , broad white perianth, and handsome expanded yellow cup, strong grower, tall and early	0	12 6
† BIG BEN , ONE OF THE LARGEST OF TRUMPET DAFFODILS, the flowers measuring about 5 inches across, perianth primrose, trumpet yellow, of good form and substance; a strong grower and free seeder; for hybridising this should prove a valuable variety, ht. 21 in. Awarded Certificate of Merit Royal Botanic Society, 1901	5	5 0
BORDER MAID (Backhousei) , a beautiful new seedling raised by the late Dr. STUART, of <i>Chirside</i> , pure white perianth of great substance, clear yellow well-formed short trumpet, a good grower, and a valuable acquisition	0	15 0
† BRIDAL VEIL (Leedsii) , perianth snowy white and gracefully twisting, long creamy white cup of elegant form, flower drooping, very beautiful	0	8 6
† BRIDESMAID (Leedsii) , <i>new</i> 1901, perianth pure white, fairly broad and campanulate, cup white, slightly margined pale primrose, large and of globular form, prettily crinkled at brim, beautiful, ht. 20 in.per doz. 40/-	0	3 6
CASSANDRA (Poëticus) , a noble and gigantic Poet's Narcissus of tall and vigorous growth; flowers of fine substance, with broad wide-spreading clear white perianth, cup deeply rimmed dark red, ht. 17 in. Award of Merit R.H.S.	0	15 0
CECILY HILL (Barrii) , a beautiful flower, with fine stiff perianth of a soft primrose flushed yellow at base, cup yellow, flushed orange-red, and edged cinnabar-red, <i>late flowering</i> , ht. 19 in.	0	7 6
CONSTELLATION (Incomparabilis) , a beautiful flower with large white perianth and bright yellow cup prettily crimped at brim, and margined orange; tall strong grower, ht. 20 in.per doz. 30/-	0	2 9
† DUCHESS OF NORMANDY , <i>new</i> 1901, a very early and beautiful Trumpet-Daffodil, perianth white, fairly broad, slightly shouldered and twisting, long handsome white trumpet prettily ribbed and with open flanged mouth, delicately scented	0	15 0
† DUKE OF BEDFORD (Bicolor) , a magnificent flower, measuring 4½ inches across; perianth pure white, broad and of great size, trumpet clear soft yellow, very large and of fine substance and form, measuring 2½ inches across at the mouth; it flowers very early, opening before <i>Horsfieldii</i> , and has a pleasing fragrance, ht. 22 in. Awarded First-Class Certificates at Birmingham, Manchester, Edinburgh, and Wisbech	5	5 0
† EGRET (Burbidgei) , broad white perianth of fine form, cup very large and flattened, 1½ in. in diameter, lemon shaded and margined gold, prettily fluted, a lovely flower. Award of Merit Birmingham, 1902	7	7 0

Beautiful New and Rare Daffodils—continued.

	each.	£	s.	d.
† ELVIRA (Poetaz) , the best representative of a new section of Daffodils, the result of a cross between the finest varieties of <i>Polyanthus Narcissi</i> and <i>Poëticus ornatus</i> , the latter being the seed-bearing parent. The plant is of tall, elegant growth, each flower stem bearing a head of three or four large flowers of good form, with broad white petals of great substance and golden-yellow cup edged orange; delicately fragrant. It is as hardy out of doors as any other Daffodil, and is of great value for early forcingper doz. 15/-	0	1	6	
§ FIRE GLOW (Bernardi) , perianth snow-white, cup glowing crimson, colour lasting well in the sun, ht. 12 in.	0	15	0	
† GLORIA MUNDI (Incomparabilis) , a glorious flower with fine bold clear rich yellow perianth, large cup much expanded and very heavily stained orange-scarlet, handsome and striking, <i>extra fine</i> , strong grower, ht. 18 in. Awarded First-Class Certificates R.H.S. and Midland Daffodil Society. This is without doubt the finest yellow <i>Incomparabilis</i> with stained cup yet raised, and is a noble flower either for the flower garden or for cuttingper doz. 12/-	0	12	6	
* † GLORY (Poëticus) , new 1901, a magnificent flower, with very large petals of great size; one of the finest <i>Poëticus</i> varieties yet raised, ht. 16 in. Awarded First-Class Certificate at Manchester, 1901per doz. 11/-	1	1	0	
GOLDEN BELL , broad light yellow twisting perianth, large bold golden trumpet, with open finely frilled mouth, tall grower and remarkably free bloomer, flower very durable. First-Class Certificate R.H.S.	1	1	0	
† HILLSIDE DAFFODIL , a handsome rich golden-yellow early flowering Daffodil, with large broadly expanded trumpet gaufered at mouth, ht. 15 in.	0	7	6	
HON. MRS. JOCELYN , new 1901, flower large and artistic in form, of a rich uniform golden-yellow colour, with large wingy perianth longer than the straight crown, handsome free bloomer, of good constitution, ht. 19 in.	0	15	0	
† KING ALFRED , a remarkably handsome Daffodil which we can strongly recommend; flowers of large size, great substance, and of refined finish; colour a uniform clear rich golden; trumpet large and of elegant form, with open deeply frilled mouth; very tall vigorous grower and free bloomer; foliage of a handsome bluish shade, ht. 24 in. First-Class Certificate, R.H.S., 1899per doz. 5 10 0	5	10	0	
LISMORE , (2) perianth white, very faintly tinged delicate clear green, trumpet palest primrose shading to white; a beautiful Daffodil and of strong constitution, ht. 14 in. Awarded First Prize, Truro, 1899per doz. 15 0 0	0	15	0	
† LOBSTER (Incomparabilis) , deep yellow perianth, cup stained orange-red, which deepens in the sun; showy, ht. 18 in.	0	10	6	
† LORD ROBERTS , new 1901, a grand new Trumpet Daffodil, raised at our <i>Long Ditton</i> Nurseries; flowers of enormous size, golden-yellow, with broad massive perianth and noble trumpet; tall grower and free bloomer, with strong constitution, ht. 23 in. Awarded First-Class Certificates by the R.H.S., Midland Daffodil Society, and Cornwall Daffodil Society, 1901 (See Illustration, page 8)per doz. 21 0 0	21	0	0	
† LOUISE (Incomparabilis) , a handsome flower of great substance, with broad round white perianth, and bold canary-yellow cup prettily crimped at margin, and slightly tinged orange, ht. 15 in.per doz. 24/-	0	2	3	
LUCIFER (Incomparabilis) , true (raised by St. Brigid), large handsome white perianth; cup an intense glowing orange-red, colour lasting well in the sun, very striking; strong grower and free bloomer, ht. 18 in. Awarded First-Class Certificates by the R.H.S. and Midland Daffodil Society, 1901per doz. 2 10 0	2	10	0	
LULWORTH (Incomparabilis) , pure white perianth, cup bright orange-red. Some seasons the cup is unfortunately inclined to split, but when perfect it is a charming and beautiful flower; of dwarf habit, ht. 14 in.	0	5	6	
† MADAME DE GRAAFF , this is one of the largest of White Trumpet Daffodils, and a flower of delicate beauty and good substance, perianth pure white, trumpet pale primrose passing off white, a strong grower and free bloomer, ht. 16 in. First-Class Certificate R.H.S.per doz. 63/-	0	5	6	
† MAGGIE MAY (syn. Edmond's White) , one of the most beautiful Daffodils of the <i>Leedsii</i> section yet offered; flowers of great size, with white perianth and very large pale citron cup beautifully frilled; a fine strong grower, ht. 22 in. First-Class Certificate R.H.S.; First-Class Certificate, Birmingham. (See Illustration, page 21)per doz. 10 10 0	10	10	0	
† MRS. MORLAND CROSFIELD (Bicolor) , a large showy and very beautiful flower, remarkably pure in colour, with long bold clear yellow trumpet and large white perianth; it blooms as early as <i>Horsfieldii</i> and is a great acquisition to the early Trumpets; ht. 19 in.	1	10	0	
† MODEL (Leedsii) , new 1902, short, broad, rather campanulate white perianth, large globular primrose-coloured crown; a beautiful flowerper doz. 7 6 0	0	7	6	

Beautiful New and Rare Daffodils—continued.

	each.	£	s.	d.
† MONARCH , a noble flower, and one of the most refined of all the Giant Golden Trumpeters; perianth and trumpet rich full yellow and very large, of perfect form and fine substance, growth strong and sturdy, ht. 20 in.		7	7	0
MOUNTAIN MAID (Leedsii) , <i>new</i> 1901, broad snowy white petals, and pure white cup, flower of graceful drooping habit, an exquisitely beautiful flower, ht. 15 in.		0	7	6
PERFECTUS (Incomparabilis) , a flower of great substance and charming symmetry, having a well-formed stiff white perianth and expanded canary-yellow cup faintly tinged orange, ht. 21 in.per doz. 24/-		0	2	3
PHYLLIS (Leedsii) , <i>new</i> 1901, large and beautiful, perianth white, straight canary-coloured cup, prettily fluted and flanged at brim, ht. 15 in.		0	6	6
† RAY SMITH , a uniform rich yellow Trumpet Daffodil, distinct and elegant in form and of good substance, perianth gracefully twisted and tapering to a point; a strong grower with broad deep glaucous blue foliage, very handsome, ht. 16 in.per doz. 36/-		0	3	6
RED COAT (Incomparabilis) , a remarkable variety, having an orange glow in the yellow perianth, cup orange-red, crenulated at brim; this is the first sign of a break of orange-red in the perianth of any seedling yet raised, ht. 22 in.		0	17	6
† ROSALIND (Burbidgei) , a very handsome late variety, flowers pendant, perianth broad and solid white, slightly inclined to reflex, cup bright yellow, deeply edged fiery scarlet, very showy and beautiful; flower lasting an unusually long time		1	10	0
SCEPTRE (Burbidgei) , flower large and very beautiful, perianth delicate primrose, cup prettily fluted and of very bright fiery orange-red; plant of tall stiff habit		5	5	0
SEAGULL (Leedsii) , large spreading pure white perianth, cup canary edged apricot, a very beautiful flower		3	3	0
† SENTINEL (Bicolor) , broad erect spreading perianth of a pure white, with short clear yellow trumpet, expanded and flanged at mouth, strong grower, flowers just topping the foliage; a very effective and desirable variety, ht. 15 in.per doz. 21/-		0	2	0
SEQUIN (Burbidgei) , a very distinct and beautiful new seedling, with solid snowy white perianth and very large broad golden cup flattened against the perianth like a golden coin; strong healthy grower, ht. 12 in.per doz. 36/-		0	3	6
SPRIGHTLY , a charming Trumpet Daffodil of medium size, rich golden colour, of good substance and pretty form, foliage deep blue-green, a strong grower, free bloomer, and early, ht. 15 in.		0	5	6
† STELLA SUPERBA (Incomparabilis) , a grand bold flower, far superior to <i>Incomparabilis</i> Stella, flowers more than twice the size, with large clear white spreading perianth and a showy yellow cup; it is a strong grower and excellent for cutting, having a long stem, ht. 20 in.per 100, 25/-; per doz. 3/6		0	0	4
THE SISTERHOOD (Leedsii) , <i>new</i> 1901, very distinct and attractive, perianth white, cup pale buff-primrose, prettily fluted; two or three flowers on a stem, ht. 20 in.		0	7	6
† THISBE (Burbidgei) , perianth white and slightly reflexed, cup very large and spreading, canary-yellow heavily margined fiery salmon-red, very beautiful and striking; a moderately tall grower.		0	7	6
UNA (Leedsii) , a flower of great size, with large creamy white perianth, and long straight crown, of a bright citron tinged apricot; a vigorous grower and free bloomer, ht. 18 in. ...		1	10	0
VESUVIUS (Incomparabilis) , sulphury white perianth, cup stained glowing orange-red; good grower and profuse bloomer, ht. 15 in.per doz. 24/-		0	2	3
VIVID (Burbidgei) , cream-coloured perianth, cup large and saucer-shaped of fiery orange-red, the colour lasting well; a remarkably showy and striking flower.		3	3	0
WEARDALE PERFECTION , one of the largest and grandest of all Daffodils, and at the same time a flower of refined beauty; it has a large white perianth, and a very pale primrose trumpet of immense size, ht. 24 in. Awarded First-Class Certificate by the R.H.S. 1894, and the Premier Prize as being the "Finest Daffodil" at the Birmingham Daffodil Show, 1894, and Floral Certificate at the Daffodil Conference, 1896. At the Midland Daffodil Society's Show, April 25th, 1900, some blooms of this Narcissus were exhibited measuring 5 inches across. (See Illustration, page 8)		5	0	0
WHITE LADY (Leedsii) , an exquisite flower with broad white perianth of perfect form, cup prettily crinkled of a beautiful pale canary shade, very chaste. Award of Merit R.H.S.		1	1	0
WHITE QUEEN (Leedsii) , resembling a <i>White Sir Watkin</i> , large broad pure white perianth, very large bold straight cup, pale citron passing to white, with an exquisitely frilled edge; a magnificent flower of the highest refinement; strong sturdy grower. Awarded First-Class Certificate R.H.S.		20	0	0
† WILLIE BARR , a handsome Trumpet Daffodil, perianth clear soft yellow of fine campanulate form and good substance, trumpet rich deep yellow with elegant brim; strong sturdy grower, ht. 15 in.per doz. 12/6		0	1	3

1 Bulb each of the above-named 54 handsome New Daffodils, £112.

General List of Barr's Daffodils.

The following list of Daffodils embraces the highest class, and most distinct varieties, surpassing in beauty and diversity all other assortments offered to the public. They represent the cream of our Collection (over 500 kinds), and the best of the newest varieties in commerce up to 1902, several being offered to the public for the first time this season. During the past few years we have discarded many of the older kinds which we considered had been superseded by better sorts, those which are now offered by us being really good and distinct. *Those kinds which are marked in this Catalogue "discarded," can be supplied if required.*

THE ORDER OF TIME OF FLOWERING.

The relative period of flowering of the different varieties and species out of doors we have denoted by means of numbers after the names, thus :

- (1) **1st early**, flowering from February to early March.
- (2) **2nd early**, flowering in March.
- (3) Varieties flowering in **mid-season**, or early in April.
- (4) **Late-flowering** varieties, from middle to end of April.
- (5) **Very late-flowering** varieties, opening in May.

The actual period of blooming depends upon the season and district ; thus in early districts (1) would commence in January and early February, while in colder districts end of February or beginning of March ; but the natural rotation would remain the same.

In most cases we give also the heights in inches as recorded at our nurseries this season.

FOR ALPHABETICAL INDEX of all the varieties offered in the following list, see page 2 of Cover.

☛ The varieties marked thus * thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

☛ † indicates those kinds which should be selected where Daffodils are grown in pots.

☛ § indicates those Daffodils which, besides being fine border plants, make a pretty effect when naturalised in grass ; they are all strong growers and free bloomers.

DAFFODILS.—GROUP I.—MAGNI-CORONATI (Baker).

AJAX of Salisbury, Haworth, and Herbert, **PSEUDO-NARCISSUS** of Parkinson.

THE LARGE-CROWNED or TRUMPET DAFFODILS, INCLUDING ALSO THE HOOP-PETTICOAT or MEDUSA'S TRUMPET DAFFODILS (CORBULARIA or BULBOCODIUM).

DISTINGUISHING CHARACTER.—Crown of Trumpet as long or rather longer than the perianth segments.

NARCISSUS CORBULARIA (Bulbocodium).

The Hoop Petticoat, or Medusa's Trumpet Daffodils.

For rockwork, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration. See *Cultural Notes*, pp. 3 and 4.

† VICTORIA (3), a grand Trumpet Daffodil, introduced by us in 1897, and highly appreciated by all. The Daffodil Committee of the R.H.S. gave it an Award of Merit , April 27th, 1897, and the Royal Botanic Society awarded it a Certificate of Merit , March 30th, 1897. The flowers are large, bold, and erect, with creamy white perianth of remarkable breadth and good quality; the trumpet is a clear rich yellow, large, broad, and of great substance, beautifully flanged and frilled at mouth, a very free strong grower, ht. 18 in. It forces easily, and when flowered under glass the perianth is of a snowy whiteness, rendering it one of the most beautiful <i>Bicolor Daffodils</i>	per 100, 50/-	7	0...0 8	
† WEARDALE PERFECTION (4). See <i>New and Rare Daffodils</i> , page 11, each £5				

TRUMPET DAFFODILS.**Silvery-White and Sulphur-Coloured Varieties.**

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone-meal or basic slag may be used (for full directions, see page 3). The varieties marked thus * *prefer shade or a north-west aspect*.

DAFFODILS.—CROUP II.—MEDIO-CORONATI (of Baker.)

The Chalice-Cupped Daffodils or Star Narcissi.

QUELTIA, PHILOGYNE, GANYMEDES, ETC., OF SALISBURY, HAWORTH, AND HERBERT; PEERLESS, NONSUCH, ETC., OF PARKINSON.

The varieties of this group are hybrids, excepting *Triandrus* and *Juncifolius*, which are species. *Incomparabilis* and *Barrii* are the result of garden crosses between yellow Trumpet Daffodils and *Narcissus* *Poëticus*; *Leedsii*, a garden cross between White Trumpet Daffodils and *Poëticus*; *Backhousei* and *Nelsoni*, the result of a Trumpet Bicolor var. crossed with *Poëticus*; *Bernardi*, a natural cross between *Abscissus* (Trumpet Daffodil) and *Poëticus*; *Tridymus* is a garden hybrid between a Trumpet Daffodil and a *Tazetta* or *Polyanthus* *Narcissus*; *Macleaii*, an ancient hybrid, origin unknown, but it may be a cross between a Trumpet Bicolor and a *Tazetta* or *Polyanthus* *Narcissus*; *Odorus*, a hybrid between a Trumpet Daffodil and *Narcissus* *Jonquilla*; *Biflorus* is the result of a natural cross between *Narcissus* *Tazetta* and *Poëticus*.

The varieties in this group commence flowering in March, and furnish a succession till May. They are all of elegant beauty, and as cut flowers are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (see page 4).

☛ The varieties marked thus * are not suitable for all cultivated borders, but thrive best under the shade of deciduous trees such as fruit trees, etc., or naturalised in grass in shady nooks, or on grassy slopes facing north or north-west.

NARCISSUS INCOMPARABILIS.

DISTINGUISHING CHARACTER.—Crown or cup half as long as the perianth segments, but in one or two cases three quarters as long.

The Chalice-Cupped Daffodils or Star Narcissi.

All these make charming pot-plants, while the cut flowers are of great value in decoration. For beds and borders they are very showy, and naturalised in grass few flowers are so graceful and effective. It is well to bear in mind that the depth of colouring in the cup varies according to season.

NARCISSUS LEEDSII.

The Silver-White Star Narcissi, or Eucharis-flowered Fragrant Peerless White Daffodils.

DISTINGUISHING CHARACTER.—Shape of flowers resembling *N. incomparabilis* and *N. barrii* Sections, but differing in the colour of the cup or crown, which is either pure white or of a very pale lemon shade passing off white.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders, and naturalised, they are most charming.

Narcissus Leedsii Maggie May (*syn. Edmond's White*). *Reduced.*

The largest and most beautiful Daffodil of the *Leedsii* section yet offered; flowers of great size with spreading white perianth and very large pale citron cup, beautifully frilled; a fine strong grower. *First-Class Certificate R.H.S.* and at the *Midland Daffodil Society's Show, Birmingham.* (See page 10.)

Reproduced from Photograph taken at Barr & Sons' Nurseries. (Copyright.)

Narcissus Poeticus Almira. (*Reduced.*) See page 27.

NARCISSUS BARRIL.

Star Narcissi with Shortened Chalice Cup.

DISTINGUISHING CHARACTER.—Perianth segments twice or more the length of the short expanded cup or crown.

The beauty of these Narcissi renders them of great value for indoor decoration (3 or 5 bulbs in a 5-inch pot), while for beds, borders, naturalisation, and as cut flowers they are very highly prized.

NARCISSUS TRIANDRUS (*syn. Ganymedes*).**The White Cyclamen-flowered Daffodil.**

This dainty little "ANGEL'S TEARS" Daffodil was found by our Mr. Peter Barr on the mountains of Portugal and Spain, growing in very hard, firm, fine gritty soil, sometimes in the narrowest fissures of granite and slatestone rocks. They are veritable gems when grown in pots (*see page 4*), while on rockwork they form a picture full of grace and beauty. *They all prefer shade, a gritty soil, and well-drained position.*

ALBUS (3), an exquisitely beautiful little flower, appropriately called the "Angel's Tears" Daffodil, the flowers are white and are variable in size, perianth elegantly reflexed, ht. 7 in.per doz. each. *s. d. s. d.*

† **CALATHINUS** (3). One of the most beautiful little Daffodils in existence. The flowers are much larger and quite distinct in form from *Triandrus albus*; the cup is large of a snowy white, and very elegant in form, perianth snowy white and elegantly reflexed, ht. 7 in. For pot culture and rockwork it is a perfect gem. Mr. Peter Barr collected this rare Daffodil some years ago in the Isles of Glénan, the collecting being attended with a good deal of risk. It is now almost extinct on those islands, and we therefore recommend purchasers to take every care of this lovely and rare flower. (*See Illustration on front cover of 1899 Daffodil Catalogue*)per 100, 8/6 1 3... —
Larger-size bulbs 10/6 1 6...0 2

† **CONCOLOR** (3), uniform soft yellow, rare and beautiful, ht. 7 in.per doz. each. *s. d. s. d.*

NARCISSUS JUNCIFOLIUS.**The Miniature Rush-leaved Daffodil.**

A charming and elegant little species for pots (*see page 4*) or for select spots on rockwork.

†**JUNCIFOLIUS** (4), a slender-growing dwarf species, with small graceful rich yellow flowers, about the size of a buttercup, with a perfectly flat little crown, height 3 to 4 inches, flowers delicately fragrant, a native of the Pyrenees per doz. each. s. d. s. d.
..... per 100, 6/6 1 0... —

DAFFODILS.—GROUP III.—PARVI-CORONATI (Baker).**The Small-Crowned Daffodil or True Narcissus.**

DISTINGUISHING CHARACTER.—Crown less than half as long as the divisions of the perianth.

In this series, *Poëticus* (the Poet's Daffodil) is the flower popularly called the *Narcissus*; *Burbidgei* is a hybrid between *Incomparabilis* and *Poëticus*, and is the connecting link between Groups II. and III. *Biflorus* is Parkinson's Primrose-Peerless, a hybrid of *Tazetta* and *Poëticus*. *Gracilis* and *Tenuior* are the Helena of Haworth; *Jonquil* the Jonquilla of Linnæus; *Polyanthus Narcissus* the Hermione of Haworth and *Tazetta* of Sibthorp.

NARCISSUS BURBIDGEI.**Hybrid Poet's Daffodils or Star Narcissi.**

These with their light and graceful habit and beautiful blossoms are much valued as pot plants (3 to 6 in a pot), and for vases, bouquets, and buttonholes; in beds and borders they are specially attractive, while naturalised in grass few plants are so beautiful.

The *Burbidgei* *Narcissi* differ from *N. Poëticus* in the cup of the flower being a trifle longer; the early forms commence flowering before *Poëticus ornatus*, and continue flowering in succession, one variety after another, from March to the middle of May.

§†**BURBIDGEI** (3), perianth clear white, cup primrose suffused and margined with cinabar-red, much prized for cutting, *early* ht. 13 in. per 1000, 25/-; per 100, 2/9 per doz. each. s. d. s. d.

VIVID. *See New Daffodils, page 11* each £3 3s.

NARCISSUS POËTICUS.

The Purple-ringed Poet's Daffodil or White Star Narcissus.

Poeticus divides naturally into *early*- and *late*-flowering varieties. It is from the early section, especially *Poeticus ornatus*, that Covent Garden is supplied with forced cut flowers from January to March. Early planting is specially recommended for these Poet's Daffodils.

Referring to the great beauty of these Poet's Daffodils when naturalised, Mr. William Robinson writes: "Four years ago I cleared a little valley of various fences. Through this runs a streamlet, and we grouped the Poet's Narcissi near it, also in a little orchard that lay near, and through a grove of oaks. This year the whole landscape was a picture such as one might see in an Alpine valley."

March and April Early-flowering Section.

Very beautiful for indoors, 5 bulbs in a 4- or 5-inch pot. Charming in beds and borders, while naturalised in grass they present in spring a most lovely sight.

		per doz. each.	s.	d.	s.	d.
§ ORNATUS (4), perianth pure white, broad and well formed, cup margined with scarlet, <i>very early, extra fine</i> , ht. 13 in. This beautiful early Poet's Narcissus is grown by the million for the flower markets, and is largely used in church decorations, etc.; it forces freely and is a gem for massing in grass, flower borders, etc., per 1000, 30/-; per 100, 3/6		0	6	...	—

☞ For the Large Dutch Varieties of Polyanthus Narcissus (N. Tazetta), See GENERAL BULB CATALOGUE.

**IMPLEMENTS FOR PLANTING DAFFODILS.**

No. 1. BARR'S SPECIAL BULB PLANTER, specially designed for planting Daffodils in grass. It lifts a clean circular little sod of grass which is released from the scoop when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have been put in. A time should be chosen for planting when the ground has become softened after early autumn rains and not when in a hard and baked condition. By the use of BARR'S SPECIAL BULB PLANTER a large quantity of bulbs may be planted in a very short time. 10/6 each.

No. 2. BARR'S SPECIAL BULB DIBBER, specially designed for dibbling bulbs into borders or grass, or where the ground is hard; steel shod, with strong iron tread and cross wooden handle, 36 inches. 9/6 each.

No. 3. BARR'S SPECIAL BULB TROWEL, made of best steel, specially designed for lifting and planting bulbs, etc. It will be found of great value for general garden purposes, and far in advance of the old-fashioned trowel. 2/9 each.

BARR'S SPECIAL LABELS for Daffodils, etc. See "Garden Requisites" in our General Bulb Catalogue.

SPECIAL OFFER OF 

Fifteen Grand Daffodils

Strongly recommended for filling Flower Beds and for Pot Culture, also to grow for Cut Bloom, or to naturalise in Grass, Woodlands, etc., etc.

Of the following Fifteen Handsome Daffodils we have cultivated large stocks, knowing how highly they would be appreciated by amateurs when obtainable at a price which will allow of their being planted in quantity. All are strong growers and free bloomers, bearing showy and beautiful flowers with long stems, and will be found of great value to cut for Vases and Church Decoration, etc.

MRS. LANGTRY , a dainty silvery Chalice-cupped Daffodil of the <i>Leedsii</i> group, having the white cup elegantly margined golden-yellow, as characteristic and novel as it is beautiful; it is one of the freest bloomers, and a general favourite for bouquets, buttonholes, and vases ...	145 0	15 0	2 3
Extra Strong Bulbs	200 0	21 0	3 0
P. R. BARR , a handsome golden-yellow Trumpet Daffodil, of sturdy, stiff habit; the flowers, which are borne on stout stems, have a refined elegance of form and are of a rich colour; for beds and borders, naturalising, or for cutting, it ranks amongst the best of Trumpet Daffodils	95 0	10 6	1 6
Extra Large Bulbs	120 0	13 6	1 10
QUEEN OF SPAIN , this lovely Daffodil might fitly be called the <i>Queen of Trumpet Daffodils</i> , so graceful is its form and delicate its colouring. The flowers, which droop slightly and just rise above the blue-green foliage, are of a uniform soft delicate yellow, with very elegant trumpet slightly expanded at mouth, and the perianth flying back; as a cut bloom it is a gem, while no Daffodil is more beautiful naturalised in grass; <i>it lasts longer in bloom than any other Daffodil</i> ...	135 0	14 6	2 0
Good Flowering Bulbs.....	135 0	14 6	2 0
Extra Strong Bulbs	—	17 6	2 6
SIR WATKIN , the Giant of the Chalice Cups , a bold, handsome rich yellow flower, with large open cup sometimes stained orange; a strong sturdy grower and free bloomer; for cutting, its showy flowers are greatly prized, while for bedding, massing, and naturalising in grass, etc., it has few equals.....	95 0	10 6	1 6
Strong Flowering Bulbs	95 0	10 6	1 6
Extra Large Bulbs	120 0	13 6	1 10
STELLA SUPERBA , a very handsome new Chalice-cupped Daffodil, with immense flowers of good substance, borne on long stout stems; perianth clear white, and spreading, large showy yellow expanded cup; it is a free bloomer and strong grower, and for cutting highly prized; naturalised in grass or used for bedding it is remarkably effective, the large handsome flowers holding their heads well up above the foliage			
Extra Strong Selected Bulbs...	—	25 0	3 6
VICTORIA , a grand Bicolor Trumpet Daffodil, and the <i>most beautiful of all</i> when forced, or grown in pots, the flowers being very large and bold, with a remarkably broad white perianth and large broad clear yellow trumpet of great substance, beautifully flanged and frilled at mouth. Award of Merit, R.H.S.; Certificate of Merit, Royal Botanic Society	—	50 0	7 0
Extra Strong Bulbs	—	50 0	7 0

BARR & SONS, 11, 12 & 13 King Street, Covent Garden, LONDON.

[P. T. O.]

A LOVELY BLUE SPRING FLOWER.

MUSCARI "HEAVENLY BLUE."

THIS is without doubt the finest of the Grape or Starch Hyacinths, and one of our most valuable Spring flowers. The flower heads are large and handsome, of a brilliant true gentian-blue colour which catches the eye at a great distance. Flowering at the same time as the Daffodils, it forms a delightful contrast to their yellow shades. For naturalising on banks, rockwork, in grass, etc., this flower can be highly recommended, also for massing in beds and borders, and forming bold edgings. As a cut flower it is highly appreciated, having a delightful fragrance.

Per 1000, 70/-; per 100, 7/6; per doz. 1/3.

MANURES, SOILS, ETC., FOR DAFFODILS.

BASIC SLAG, per cwt. 10/6; per 7 lbs. 1/- (*bags free*).

GENUINE FINE CRUSHED BONES, best quality, per cwt. 14/-; per 7 lbs. 1/3 (*bags free*).

SULPHATE OF POTASH, per cwt. 21/-; per 7 lbs. 1/9 (*bags free*).

BARR'S PHYTOBROMA, for Daffodils, Hyacinths, Tulips, etc. We can confidently recommend this as a safe general manure; it should be mixed with the soil *before* the bulbs at planting time at the rate of 4 cwt. to the acre, or 1½ oz. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given—using the same quantities.

For Pots, mix *Phytobroma* with the soil, to be used at the rate of 2 lbs. to the bushel, and in spring, when growing is showing, top dress once a fortnight, using a small teaspoonful and well mixing with surface soil. PRICES: 2-lb. tin, 1/-; 7 lbs. 2/6; 14 lbs. 4/6; 28 lbs. 7/6; 56 lbs. 12/6; 1 cwt. 20/- (*bags free*).

BARR'S SPECIAL MIXED POTTING SOIL, 2/6 per bushel (*bags free*).

BARR'S PREPARED COCOA FIBRE AND CHARCOAL MIXTURE, for growing bulbs in bowls, jardinetts, etc. (*see page 4*). 3/6 per bushel; 1/- per peck (*bags free*).

SMALL PEBBLES, suitable for growing Daffodils and Hyacinths in, 6d. per quart; 3/6 per peck.

FANCY DECORATED JAPANESE BOWLS, suitable for growing Daffodils in:—
5 in. diameter. -/10; 6 in. dia. 1/3; 7 in. dia. 1/9; 8 in. dia. 3/-; 9½ in. dia. 4/-; 10¾ in. dia. 6/-;
12 in. dia. 8/6 each.

Daffodil Notices.

**Our Nurseries,
Ditton Hill.**

Visitors invited during Spring to see our magnificent collection of Daffodils in bloom. The nurseries are situated within a mile of **Surbiton Station** on the London and South-Western Railway. Cabs are always to be had at Surbiton Station.

**Cut Daffodil
Flowers.**

When in bloom out-of-doors, cut specimens of Daffodils, correctly named, we forward post-paid at a moderate charge, to cover attendant expenses, thus offering a good opportunity to those who wish to extend their knowledge of these lovely flowers of Spring. If a list of the varieties possessed by the sender is enclosed, such sorts will be omitted. *A remittance should accompany the order.*

1 flower each of 12 sorts, 1/6; 1 each of 25 sorts, 3/6; 1 each of 50 sorts, 6/-
3 flowers „ 12 „ 3/-; 3 „ 25 „ 5/6; 3 „ 50 „ 10/6

Cut Daffodil Flowers (without names) in variety, for decoration, 4/6, 5/6 & 7/6 per 100.

Naming

Daffodils.

Cut specimens of Daffodils we undertake to name correctly, at the charge of 4d. each, 2s. per dozen, to cover attendant expenses. Address all cut specimens to be named, accompanied by a remittance, to our Nurseries, Ditton Hill, Surrey.

Daffodil

Prizes. Particulars of **Competitions, Spring 1903**, for Barr's Silver Daffodil Cups, will be sent on application.

Notices to Our Foreign and Colonial Correspondents.

**Prepayment
necessary.**

Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders a remittance, a draft, or an "order to pay" on a London Bank, or Agent; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

**Particulars of
Freight.**

Australia per Parcel Post at 6d. per lb. (1s. being charged for the first lb.), or per "Eastern Express," at 6d. per lb. (minimum 2s.)

New Zealand, per Parcel Post under 3 lbs. 1s.; 7 lbs. 2s.; 11 lbs. 3s.

~~£~~ We recommend the Parcel Post to be used where possible, parcels thus sent being delivered at the Customer's house quicker, and without any additional charges.

India.—Seeds and Bulbs can be despatched to all postal towns in India, by Parcel Post at the rate of 1 lb. for 1s.; 2 lbs. for 1s. 8d.; 3 lbs. 2s. 4d.; 7 lbs. 3s. 6d. 11 lbs. 5s.; or by "Eastern Express," at 6d. per lb. up to 30 lbs., after 30 lbs. cheaper as cargo.

Shipping, etc.

In Shipping Bulbs and Plants to Australia, New Zealand, America, India, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies extends over a long period.
